

CONSTRUCTION

SETUP WITH GROUPTALK

In most regions of the world, construction workers are among the most exposed personnel for accidents, costly in both human and financial assets. Instant communication and personal alarm can reduce the number of accidents and improve relief efforts.

CHALLENGE

Construction sites vary in size from small to large areas, as well as from one to many locations. A reliable communication service suitable for all types of projects are needed. Trucks, escalators, crane and lift personnel need to communicate in different groups and at the same time management and planning needs to be able to get hold of resources. Frequently personnel is geographically distributed and communication must be possible without range limitations. A protection plan for lone workers or personnel exposed for dangers is important to give the personnel peace of mind but also to meet the requirements and expectations from authorities and clients.

✓ SOLUTION

Services from GroupTalk use secure communications without range, PTT group or user limitations. The service can be setup according to the customers needs, with groups for the different competences, functions, areas, tasks or with generic groups. A personal alarm for exposed personnel reporting to both nearby colleagues and central resources reduce costs and gives a valid contribution to the company HSE (Health Safety Environment) procedures.
